THE BCP SPLIT DEPOSIT BOND 9

These innovative bonds offer investors a two tier investment package. 25% is placed in a 12 month high yield deposit account which assures investors of a 6% gross gain (6% AER). 75% is invested in a 3½ year Quadruple and/or Double Growth Bond.

HOW THE BONDS WORK

12 MONTH HIGH YIELD DEPOSIT ACCOUNT

25% of the BCP Split Deposit Bond 9 is placed in a 12 month deposit account which assures investors of 100% capital security provided by Bank of Ireland and assures investors of a 6% gross gain (6% AER) on the deposit element.

At the end of 12 months, on 30th March 2011, the investment amount along with interest of 6% gross (6% AER) will be paid out to investors. Where applicable, interest will be subject to Deposit Interest Retention Tax (DIRT) currently 25%.

QUADRUPLE/DOUBLE GROWTH BOND

75% is allocated to the basket which is equally weighted between each of the 24 shares. At the end of the Investment Term on 23rd September 2013, the percentage performance (gain or loss) of each share is calculated (the increase in each share in the basket being limited to 17.5%). The average performance of the 24 shares is then calculated and this percentage will then be doubled or quadrupled to determine the Interest to be added to the capital amount secured in each bond.

In order to protect the performance of the basket from short-term volatility in stock markets towards the end of the Term, the Final Price will reflect the average price of each share on a monthly basis over the final 6 months of the Term. The effect of averaging is to protect returns in a falling market but conversely it may restrict growth in a rising market.

THE BCP QUADRUPLE GROWTH BOND

90% Capital Security provided by Bank of Ireland

The Quadruple Growth Bond will pay investors four times the average growth achieved by the equity basket of 24 shares, the return being capped at 60%, equivalent to 17.1% gross per annum (CAR 14.4%) over the 3½ year investment Term.

Calculation of Return

75% of your investment is allocated to the basket which is equally weighted between each of the 24 shares. Whatever the growth in the shares in the equity basket up to 17.5% over the investment Term, the Quadruple Growth Bond will quadruple the growth. This is added to the minimum amount (90% of this portion of your investment) that is capital protected. For example, if the basket performance is 17.5%, the return to investors will be 90% of the invested amount plus 70% (4 x 17.5%) to give the total maximum return of 60%. If the basket performance is less than 2.5% over the 3½ year investment Term, you will receive back between 90% and 100% of this portion of your investment. In any event, Bank of Ireland will pay at least 90% of the portion invested in this part of the Bond.

EXAMPLE RETURN:

If the basket performance is 15% the return to investors will be 90% of the invested amount plus 60% (4 x 15%) giving a gross return of 50%, equivalent to 14.3% per annum (CAR 12.3%) (36% after DIRT at 28%).

WARNING: The basket performance figures used above are for example purposes only. They are not a reliable guide to the future performance of this investment. If you invest in the BCP Quadruple Growth Bond you could lose 10% of the money you put in.

THE BCP DOUBLE GROWTH BOND

100% Capital Security provided by Bank of Ireland

For investors who want higher capital security, the Double Growth Bond will return 200% of the growth from the same basket of shares capped at 35%, equivalent to 10% gross per annum (CAR 9%) over the 3½ year investment Term.

Calculation of Return

75% of your investment is allocated to the basket which is equally weighted between each of the 24 shares. In this case, whatever the growth in the shares in the equity basket up to 17.5% over the investment term, the growth is doubled to calculate the return in the Bond. Again, if the average performance is 17.5%, the return to investors will be 100% of the invested amount plus 35% (2 x 17.5%) to give the total maximum return of 35%. Even if the equity performance is negative over the Term of the Bond, Bank of Ireland will pay 100% of the portion invested in this part of the Bond.

EXAMPLE RETURN:

If the basket performance is 15% the return to investors will be 100% of the invested amount plus 30% (2 x 15%) giving a gross return of 30%, equivalent to 8.6% per annum (CAR 7.8%) (21.6% after DIRT at 28%).

WARNING: The basket performance figures used above are for example purposes only. They are not a reliable guide to the future performance of this investment.

Note: CAR is the Compound Annual Return and illustrates what the gross interest would be if the Interest was paid and re-invested each year.

TAXATION

Under current legislation, the gross interest earned on the high yield deposit account will be subject to Deposit Interest Retention Tax at 25%, and the gross interest earned on the Quadruple/Double Growth Bond will be subject to DIRT at 28%. This will apply at maturity and will be deducted at source. However, certain non resident investors, credit unions, charities, pensions and companies may apply to receive returns gross without deduction of tax.

The Finance Act, 2007, allows the operation of DIRT free accounts for investors aged 65 years or over, whose income is under €20,000 (or €40,000 for married couples).
