

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

AMUNDI PHYSICAL GOLD ETC

ISIN code: FR0013416716

Manufacturer : Amundi Physical Metals plc

Regulator : Central Bank of Ireland

More information is available at amundiETF.com or by calling +33 (0) 1 76 32 47 74

This document is dated 1 October 2021

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type:

AMUNDI PHYSICAL GOLD ETC (the ETC) is a series of debt securities governed by Irish Law and issued by Amundi Physical Metals plc (the Issuer) in US dollars that are linked to physical gold. The ETC are limited recourse securities.

Objectives:

The ETC securities provide exposure to physical gold and are valued based on the London Bullion Market Association (LBMA) gold price.

The Issuer holds physical gold. Each ETC security has a metal entitlement (Metal Entitlement), which is the amount of physical gold backing the ETC security. The Metal Entitlement is reduced on a daily basis to reflect the total expense ratio. Such total expense ratio and the daily Metal Entitlement can be found on www.amundiETF.com.

The ETC securities are not capital protected and you may lose some or all of your investment. You may choose to sell your ETC securities prior to the maturity date in accordance with your investment objectives. You should be aware that the ETC securities entitle you to receive a payment calculated by reference to the value of gold. The gold price fluctuates daily and the value of gold is driven by various factors including its rarity, use in industrial processes and its use as an investment commodity. Pricing of precious metals can be impacted by fundamental issues of supply and demand, political and economic situations (especially in precious metal producing countries) and natural disasters. These factors may all affect the value of your investment.

The ETC's base currency is US dollars. The ETC securities can be listed and traded in currencies other than US dollars on one or more stock exchanges. The performance of the ETC securities may be affected by this currency difference.

Intended retail investors:

The ETC securities are intended for retail investors who (1) can bear loss of capital and who are not looking for capital guarantee and (2) seek a product offering an exposure to the performance of gold and are willing to hold a medium to long-term investment.

Term:

This series of ETC securities has a 99 Year term with a scheduled maturity date of 23 May 2118. In certain circumstances the Issuer, subject to prior written notice, has the right to terminate the product in a limited number of circumstances, as set out in the Prospectus. The ETC may also be terminated if certain service providers appointed by the Issuer resign or their appointment is terminated and no successor has been appointed within 120 days.

What are the risks and what could I get in return?

Risk indicator:

Lower risk

Higher risk

The risk indicator assumes you keep the ETC securities for 5 years.

The actual risk can vary significantly if you sell your ETC securities at an early stage and may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This classification rates the potential losses from future performance at a medium level, and poor market conditions could affect the value of your investment. This classification is not guaranteed and may change over time and may not be a reliable indication of the future risk profile of this ETC.

The lowest category does not mean risk free.

Be aware of currency risk. The currency of this ETC (and/or the trading line of your ETC securities) may be different from that of your country. As you may receive payments in a currency not that of your country, the final return will depend on the exchange rate between these two currencies. This risk is not considered in the indicator shown above.

The insolvency of certain institutions providing services such as safekeeping of assets may expose the ETC to financial loss.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If the ETC is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios:

Investissement : USD 10,000.00				
Scenarios		1 year	3 years	5 years (recommended holding period)
Stress	What you might get back after costs	6 702.87	4 813.15	3 759.47
	Average annual return	-32.97%	-21.63%	-17.77%
Unfavourable	What you might get back after costs	9 532.70	11 471.12	14 518.48
	Average annual return	-4.67%	4.68%	7.74%
Moderate	What you might get back after costs	11 901.98	16 840.75	23 828.89
	Average annual return	19.02%	18.97%	18.97%
Favourable	What you might get back after costs	14 832.28	24 677.6	39 036.61
	Average annual return	48.32%	35.13%	31.31%

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest USD 10,000.00.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your broker, financial adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the Issuer is unable to pay out?

In case of failure by the Issuer to pay any redemption amount when due, the trustee (HSBC Corporate Trustee (UK) Limited) can enforce the security over the gold deposited with the custodian. Once the trustee has enforced the security it can then sell the gold and use of the proceeds of this sale to pay amounts owed to you under the ETC securities. The proceeds of such sale may not be enough to cover all amounts owed to you under the ETC securities and there is no other recourse available to you. The product is a debt instrument and as such is not covered by any deposit protection scheme.

What are the costs?

Presentation of costs:

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest USD 10,000.00. The figures are estimates and may change in the future

Costs over time:

Investment USD 10,000.00

Scenarios	1 year	3 years	5 years (recommended holding period)
Total costs (USD)	12	36.03	60.03
Impact on return (RIY) per year	0.12%	0.12%	0.12%

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Composition of costs:

This table shows the impact on return per year

One-off costs	Entry costs	0.00%	The impact of the costs you pay when entering your investment.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.12%	The impact of the costs that we take each year for managing your investments.
Incidental costs	Performance fees	0.00%	The impact of the performance fee.
	Carried interests	0.00%	The impact of carried interests.

This table shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

How long should I hold it and can I take my money out early?

Recommended holding period: 5 years

This product has no required minimum Recommended Holding Period (RHP) but is designed for mid long term investment. Any investment should be considered against your specific investment needs and appetite for risk.

Neither Amundi Asset Management nor the Issuer has considered the suitability or appropriateness of this investment for your personal circumstances. If you are in any doubt about the suitability of the ETC to your needs you should seek appropriate professional advice.

You can buy or sell your ETC securities daily on the secondary market through an intermediary on stock exchange(s) on which the ETC securities are traded.

How can I complain?

Complaints about the behaviour of the person who advised you on the product or sold it to you, should be addressed directly to that person. Complaints about the product or the behaviour of the manufacturer of this product should be directed to the following email address: info-etf@amundi.com or by post to the following postal address: Amundi Physical Metals plc, 2nd Floor, Palmerston House, Fenian Street, Dublin 2, Republic of Ireland.
