The Fund borrows money to provide leverage exposure to property which will increase the risks in the fund. In stressed market conditions the gearing can accentuate losses significantly.

### Risk Indicator:

**!** This risk indicator assumes that you keep the product for 7 years. There is no capital guarantee with this investment and the returns you get back are not guaranteed. They may be very volatile over the short to medium term. For the first 2 years, from the purchase of units, investor's capital will not be accessible by the unitholder. The Fund will also have the ability to restrict investor access to their capital where redemption requests exceed 10% of the Fund NAV. You will have to pay extra costs of 0% (plus Duties) when you cash in your units. In stressed markets, the Fund redemptions are likely to be severely restricted.

circumstances, and it does not take into account the situation where we are not able to pay you.

This product may be cashed in any time (after two years) but depending on market conditions there may be restrictions (if for example redemption requests exceed 10% of the NAV of the Fund). This means it is difficult to estimate how much you would get back when you cash in. There is no exit fee taken by BCP but 2% duties & charges apply when you cash in the investment.

The figures shown include all costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The estimated returns shown in this document do not allow for taxation which some investors may be liable for.

## WHAT HAPPENS IF BCP ASSET MANAGEMENT DAC T/A BCP IS UNABLE TO PAY OUT?

Your investment is not held on BCP's balance sheet. The Fund follows best practice and legislation by using external and independent Custodians and Administrators. Legislation requires that

an Alternative Investment Fund Manager (AIFM) be appointed. Your investment is not guaranteed by any compensation scheme covering counterparty risk.

## WHAT ARE THE COSTS?

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest €10,000.

The figures are estimates and may change in the future.

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

The recommended holding period is 7 years. It was chosen based on the objectives of the fund and nature of the underlying investments. Property is a long-term investment and consequently may not be suitable as a short or medium term investment.

For the first 2 years, from the purchase of units, investor's capital will not be accessible by the unitholder. This lock-in is designed to enable the Fund to have

clarity and certainty on the amount of capital available to purchase properties for the benefit of the Fund and its unit holders. The Fund will also have the ability to restrict investors access to their capital where redemption requests exceed 10% of the NAV of the Fund.

There is no exit fee taken by BCP but 2% duties & charges apply when you cash in the investment.
