WHAT ARE THE RISKS INVOLVED IN THE BOND?

COUNTERPARTY/ CREDIT RISK

Your capital is exposed to the credit risk of The Goldman Sachs Group as the guarantor of the Certificate. If The Goldman Sachs Group defaults on its senior debt obligations you may suffer partial or full capital loss on potential return.

Your investment in the Certificate ('the instrument'/'the security') with The Goldman Sachs Group ('the institution') is subject to the Bank Recovery and Resolution Directive. Below we provide some information on the potential treatment of investments in resolution or insolvency.

- the instrument is unsecured and therefore subject to the resolution regime or normal insolvency if the institution fails;
- the impact of the institution's failure on investors depends crucially on the ranking of the liability in the insolvency creditor hierarchy (which may have changed because of the introduction of depositor preference), on the amount of losses incurred and on the resolution strategy applied;
- in the event of resolution:
 - the outstanding amount may be reduced to zero or the security may be converted into ordinary shares or other instruments of ownership for the purpose of stabilisation and loss absorption;
 - a transfer of assets to a bridge bank or in a sale of business may limit the capacity of the institution to meet repayment obligations, or may result in partial losses or no losses if the relevant liabilities are also transferred;
 - the maturity of instruments or the interest rate under these instruments can be altered and the payments may be suspended for a certain period;
- the liquidity of the secondary market in any unsecured debt instruments may be sensitive to events in financial markets;
- existing liquidity arrangements (for example repurchase agreements by the issuing institution) might not protect clients from having to sell these instruments at a substantial discount below their principal amount, in the event of financial distress of the issuing institution;
- liability holders have a right to compensation if the treatment they receive in resolution is less favourable than the treatment they would have received under normal insolvency proceedings (as a consequence of the application of the 'no creditor worse off' principle). This assessment must be based on an independent valuation of the institution. Compensation payments, if any, may be considerably later than contractual payment dates (in the same way that there may be a delay in recovering value in the event of an insolvency), although resolution, in principle, preserves value compared with insolvency

INFLATION RISK

Any inflation during the term of the Bond will reduce the real value of your investment over time.

CONCENTRATION RISK

Your investment in the Bond should only be considered as part of your overall investment portfolio. You should not put all, nor a large part, of the money you have available for investment into any one product, or with any one counterparty.

MARKET RISK

External factors could affect national economies, regions or an asset class and cause a fall in value of the equity and/or bond markets and could influence the returns payable under the Bond.

LIQUIDITY RISK

This product entails a materially relevant liquidity risk. Certain exceptional market and funding circumstances may have a negative effect on the liquidity of the product. The investor may not be able to sell the product easily or may have to sell it at a price that significantly impacts how much he/she gets back, this may entail a partial or total loss of the invested amount.

SECONDARY MARKET RISKS

Goldman Sachs intends, under normal market and funding conditions, to provide bid and offer prices for this Bond on a regular basis. Certain exceptional market circumstances may have a negative effect on the liquidity of the product. The investor may not be able to sell the product easily or may have to sell it at a price that significantly impacts how much he/she gets back. This may entail a partial or total loss of the invested amount. The Certificates may redeem below par and the redemption amount may vary considerably due to market conditions and will likely be valued at a considerable discount to its par value. Goldman Sachs may apply a charge which is equivalent to a deduction from the realised market value of no greater than 0.5%.

EARLY REDEMPTION RISK

If the Bond is sold before the Final Maturity Date then the value of the Bond may be less than the original investment amount and the investor may lose some or all of the invested amount.

LACK OF COMPENSATION SCHEME PROTECTION

Your investment is not covered by any investor compensation schemes in the event of a default of The Goldman Sachs Group (GSG).

TAXATION RISK

Current Irish taxation legislation does not allow for a clear categorisation of this product being subject to Income Tax. There is a risk an alternative taxation basis may apply.

RESTRUCTURING RISK

There is a risk that the Euro Stoxx 50 Index (the 'Index') is discontinued during the term of the investment. In this scenario the Issuer will replace the Index with an alternative Index. If there is no alternative Index available the Issuer may repay your investment before the maturity date for an amount that may be more or less than the initial amount invested. There may also be a scenario whereby there is a change in law or the Issuer's authorisation whereby the Issuer can no longer maintain the Certificate. Should this occur the Issuer may repay your investment before the maturity date for an amount that may be more or less than the initial amount invested.

Before making any investment in this product Investors should refer to the prospectus and final terms associated with it; these are available on request. It is recommended that investors read carefully the "risk factors" section of the prospectus.

Warning: If you cash in your investment before 3rd November 2026 you may lose some or all of the money you invest.

ANALYSING THE RISK OF THE INVESTMENT

As per the Key Information Document (KID) that accompanies this Bond brochure, and can be found on the bcp.ie website, a standardised risk analysis (called a Summary Risk Indicator or SRI) has been developed by the European regulatory authorities to allow investors compare and contrast, amongst other features, the risk of an investment according to pre-defined criteria and with a standardised calculation format.

The SRI is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Goldman Sachs Finance Corp International Ltd and The Goldman Sachs Group (GSG) are unable to repay the capital protected amount plus any return.

RISK ANALYSIS

The BCP 100% Protected 3 Year Euro Stoxx 50 Bond 3 is classified as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are unlikely to impact on the capacity of the Goldman Sachs Finance Corp International Ltd and The Goldman Sachs Group (GSG) to pay you.

You are entitled to receive back at least 100% of your capital at maturity. Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you redeem your investment before the maturity date.

PLEASE NOTE: If the Goldman Sachs Finance Corp International Ltd and The Goldman Sachs Group (GSG) is unable to repay what is owed, you could lose your entire investment. The risk indicator assumes you keep the product until maturity. The actual risk can vary significantly if you redeem your investment (in exceptional circumstances) at an early stage and you may get back less than you invested.

In the event that the product was subject to SFDR, there is insufficient information available on all constituent

parts of this Index to classify it as an Article 8 or Article 9 Fund under the SFDR. This investment is not suitable if you are looking for an investment that promotes ESG compatible characteristics.

ANALYSING THE INDEX

The Euro Stoxx 50 Index represents the performance of the 50 largest companies among the 19 super sectors in terms of free-float market cap in Eurozone countries. The index has a fixed number of components and is part of the STOXX blue-chip index family. The index captures about 60% of the free-float market cap of the EURO STOXX Total Market Index (TMI).

Key Facts

- One of the most liquid indices for the Eurozone: serves as the underlying for financial products (options, futures, ETFs) and for benchmarking purposes
- Well-known and serves as an underlying not only for several subindices but also for many strategy indices
- Selection methodology ensures a stable and up-to-date index composition. Fast-exit rules ensure the index accurately represents the performance of only the largest and most liquid companies in a sector
- Weighted by free-float market cap

Methodology

- From each of the 19 EURO STOXX Supersector Indices the largest stocks are added to the selection list until the coverage is as close as possible to 60% of the free-float market cap of the corresponding EURO STOXX TMI Supersector Index. Further, all current EURO STOXX 50 stocks are added to the selection list.
- The largest 40 stocks on the selection list in terms of free-float market cap are selected; the remaining 10 stocks are selected from the largest remaining current stocks ranked between 41 and 60; if the number of stocks selected is still below 50, then the largest remaining stocks are selected until there are 50 stocks.

ANALYSING THE INDEX IN MORE DETAIL

Below we have illustrated the current composition of the Index by Country and by Supersector. As you can see the Index is broadly diversified across the major developed economies and industry sectors in the Eurozone providing access to a range of potential drivers of investment growth.

PAST PERFORMANCE OF THE INDEX

The Euro Stoxx 50 Index was officially launched on the 26th February 1998. The objective of this Index is to provide a blue-chip representation of leading companies in the Eurozone. The weight of each of the 50 companies in the Index is determined by the free-float market capitalisation of each company. The Index is well diversified across countries and sectors in the Eurozone area.

The chart below illustrates the performance of the Index from 31st December 1986 to 15th August 2023. As there is over 36 year's performance to assess, the below is being provided as a basic illustration of the performance this Index has exhibited over a long period that has contained periods of strong growth as well as markets corrections

such as the Great Financial Crash in 2008, the European Sovereign Debt Crisis in 2012 and the more recent impact of the COVID-19 pandemic.

The backdrop of the past performance of this Index has encapsulated various economic cycles, from strong bull markets to deep recessions. The Euro Stoxx 50 Index declined by more than 20% from its peak level on four occasions during this 36-year period.

Past performance is not a reliable guide to future performance. The performance of the Index in the future cannot be predicted in advance.

EXAMPLES OF POTENTIAL RETURN SCENARIOS FOR INVESTORS

The table below shows examples of potential investment scenarios to assist in explaining how this Bond operates. Capital security is fixed at 100% so regardless of the Index performance the minimum investment return at maturity

will be 0% resulting in 100% of capital being returned. If the Index is at or above its Initial Index Level on the Final Valuation Date, the return is 15.6% (CAR 4.95%).

SIMULATED PAST PERFORMANCE

In order to demonstrate how the product would have performed in the past a series of tests to determine the simulated past performance of the Euro Stoxx 50 Index (the 'Index') applying the exact parameters of the strategy were carried out. The back testing data starts with a hypothetical product which was assumed to commence on 31st December 1986 and runs continuously to include a hypothetical product which was assumed to commence on 31st July 2020. The back testing analysis assumes that a hypothetical product was launched each month between 31st December 1986 and 31st July 2020. The back testing applies the past performance and simulated past performance of the Index during this period to the exact parameters of this product to determine the outcome of these hypothetical products. The Euro Stoxx 50 Index was launched on 26th February 1998 so any Index performance before this date is simulated.

The Index tracks the performance of the 50 largest companies among the 19 super sectors in terms of free-float market cap in Eurozone countries. The start date for the back test is 31st December 1986 as this is the furthest

data point for the Index. The product has an investment term of 3 years and as the back testing data was generated in August 2023, 31st July 2020 is the end date for the simulated product back testing as a hypothetical product must run for the full 3 year investment term to be included.

The back testing data is not considered to be statistically independent. The back testing is based on simulated historical monthly data points for the Index from 31st December 1986 (which is the earliest point for which data was available for the Index) to 31st July 2023, for a product that commenced on 31st July 2020. As markets have generally performed well during this period, the expectation would be for the back testing for this type of product to perform well also.

Simulated past performance is not a reliable guide to future performance. The performance of the Index in the future cannot be predicted in advance.

The hypothetical returns shown below illustrate the historic Index performance plus the 15.6% (CAR 4.95%) return in the Bond where performance is positive, and added to the amount invested.

	HYPOTHETICAL RETURNS
Minimum	100.00%
Maximum	115.60% (15.60% gain)
Recent 3 Year	115.60% (15.60% gain)

→ Clients would have received a 15.60% return 69.80% of the time.

→ Clients would have received just their initial investment (i.e. no positive return) 30.20% of the time.

Goldman Sachs provides no assurance or guarantee that the product will operate or would have operated in the past in a manner consistent with the above backtesting analysis.

COUNTERPARTY SELECTION

The Goldman Sachs Group (GSG) is the guarantor of the Issuer of the Certificate. The Issuer is Goldman Sachs Finance Corp International Ltd, which is a 100% owned subsidiary of GSG and the Certificate issued by Goldman Sachs Finance Corp International Ltd has an irrevocable and unconditional guarantee from GSG. Investors in this Bond will have capital exposure to the senior counterparty risk of GSG. In the event of a senior debt default by GSG investors capital is at risk.

Goldman Sachs is ultimately responsible for the payment of any return of capital and any investment return due from the Certificate. As a result it is imperative that the counterparty has a strong and sound financial profile and high credit strength. Investors in the Bond should familiarise themselves with the counterparty risk they are exposed to and the information below provides some of the key facts and figures behind Goldman Sachs which led BCP to select them as the preferred counterparty for this product.

THE GOLDMAN SACHS GROUP

→ The Goldman Sachs Group, Inc. is a leading global investment banking, securities and investment management firm that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and individuals. Founded in 1869, the firm is headquartered in New York and maintains offices in all major financial centres around the world.

- GSG is a bank holding company and a financial holding company regulated by the Board of Governors of the Federal Reserve System (Federal Reserve Board).
- As of 30th June 2023, Goldman Sachs employed 44,600 employees worldwide, and currently has a market capitalisation of over \$110.87 bn.
- Goldman Sachs current credit ratings are in the table below:

CREDIT RATING	FITCH	MOODY'S	STANDARD & POOR'S
The Goldman Sachs Group	A (Stable)	A2 (Stable)	BBB+ (Stable)

Source: Bloomberg as of August 2023

Warning: If the Goldman Sachs Group (GSG) were to default, you will lose some or all of your investment and potential return.

CREDIT RATINGS

One of the factors you may wish to take into account when reviewing a counterparty is its long term credit ratings. These are the opinions of a range of credit rating agencies regarding the long term security of the counterparty.

A high rating of a counterparty from one or more of the credit rating agencies is not a guarantee that the Issuer will meet its obligation to pay the amount due from the Bond. Fitch, Moody's and Standard & Poor's are independent ratings agencies that research and grade the ability of financial and other institutions to make the payments due from the Securities issued and/or guaranteed by them.

By way of example, Standard & Poor's highest possible rating is AAA, followed by AA and A. These three ratings along

with their BBB rating are generally regarded as investment grade (i.e. of higher quality). All of these ratings, except the AAA rating, can also be modified by a plus or a minus to give a counterparty's relative status within the grade; for example, A+, A, A- for the A rating. A rating outlook assesses the potential direction of a long term credit rating view over the intermediate term. The term considered varies between credit rating agencies; Fitch looks at a 12 to 24 month period, Standard & Poor's a 6 to 24 month period, while Moody's says its outlooks are 'over the medium term'. In determining a rating outlook, consideration is given to any changes in the economic and fundamental business conditions. An outlook is not necessarily a precursor of a rating change or future credit watch action.

- **POSITIVE** means that a rating may be raised.
- **NEGATIVE** means that a rating may be lowered
- **STABLE** means that a rating is not likely to change
- **UNDER REVIEW**, either positive or negative means a rating may be raised or lowered in the short term.

All references to the credit rating are correct as at August 2023. Credit ratings are subject to change during the offer period and during the term of the Bond. Ongoing information about the ratings of the Counterparty is available from

BCP and we will, where appropriate, include information relating to credit ratings in your periodic valuation statements. Please refer to your financial adviser if you have any queries regarding credit ratings.

DO I HAVE ACCESS TO MY INVESTMENT?

You should only invest in this Bond if you do not need access to your money for 3 years. While the Certificate is a listed instrument and Goldman Sachs aims to provide a secondary market under normal market and funding conditions the value will be subject to the prevailing market rate at that time, it may be less than the amount invested and an administrative charge will also apply.

There is no guarantee liquidity will be available at the time you wish to encash. exchange rates, credit spreads and any incidental costs.

Goldman Sachs may apply a charge which is equivalent to a deduction from the realised market value of no greater than 0.5%.

Deductions for fees and charges are not made uniformly throughout the life of the Bond, but are loaded onto the early period. If you withdraw from the Bond in the early period this will impact on the value you will receive.
