Solys - Quadrant Europe	SG29 Haussmann	Luxembourg	LU2359287443	https://sg29haussmann.societegenerale.fr

The Quadrant Europe Fund is actively managed by SG 29 Haussmann. The strategy implemented by the fund manager combines elements of financial analysis (balance sheet and business strength) and extra-financial analysis (exclusion of securities of companies that fail to meet environmental, social and good governance standards). The fund's assets will be allocated to the selected securities using a quantitative risk-weighting methodology. Equity exposure will vary to stabilise the fund's risk profile between bull and bear markets. Based on its distribution policy, the Fund pays a fixed annual dividend of EUR 5 per Fund unit (Net Asset Value of the fund as of 25 August 2021, the launch date of the fund: EUR 103). If the dividends effectively generated by the Fund's underlying assets are lower (respectively higher) than the fixed dividend paid, the fund's Net Asset Value will be reduced (respectively increased) compared to an equivalent fund that pays the dividends actually generated by the underlying assets. Leaving aside these dividends, the impact of a fixed dividend payout on the Fund's net asset value is more significant where the Fund falls from its initial level (negative effect) than where it rises (positive effect). Therefore, a sustained bear market will accelerate the fund's net asset value decline.

This product is designed to provide a return when the product is redeemed (either at maturity or when redeemed early). It is possible for the product to be automatically redeemed early based on pre-defined conditions. If the product is not redeemed early, both the return and the capital redemption amount will be linked to the performance of the Reference Underlying. - If the Final Level of the Reference Underlying is below the Final Barrier and is at or above the Capital Barrier, you will receive: 100% of the Nominal Value.
